

# FOODCYCLER™ MUNICIPAL SOLUTIONS

The Future of Food Waste.

# ABOUT US

## Food Cycle Science

- **Canadian company** based out of Ottawa, ON
- Founded in Cornwall in 2011 – Company is 100% focused on **Food Waste Diversion Solutions**
- Products available in North America through **FoodCycler Municipal / Vitamix** and internationally through network of distributors & OEM partners
- **Finalists** in Impact Canada/AAFC's **Food Waste Reduction Challenge**
- **Globe & Mail** Canada's **Top Growing Companies** ('21, '22, and '23)
- **Deloitte Fast 50 CleanTech** award winners ('21, '22, and '23)
- **Approved supplier** with Canoe Procurement Group of Canada

# TRUSTED CANADIAN SOLUTION

○ **2 Territories**

# THE PROBLEM – FOOD WASTE

---

- **63%** of food waste is avoidable
- Household waste is composed of **25-50%** organic waste
- Food waste weight is up to **90%** liquid mass (which is heavy)
- The average Canadian household spends **\$1,766** on food that is wasted each year
- Each year food waste in Canada is responsible for **56.6 Million tonnes of CO2** equivalent of GHG

# MUNICIPAL IMPACT

## Waste is a municipal responsibility

### LANDFILL + WASTE COSTS

- ~**25-50%** of household waste is organic waste
- Landfills are filling up fast, creating cost and environmental issues
- Hauling, transfer, and disposal services are a major cost factor and environmental contributor

### ENVIRONMENT

- Landfilled organic waste produces methane, which is **25 times** more harmful than CO<sub>2</sub>
- 1 tonne of food waste is equivalent to 1 car on the road for one year

### COMMUNITY

#### Food in the garbage:

- More frequent collection or trips to the disposal site
- Unpleasant odours
- Animals, pests & other visitors

#### Removing food waste from garbage:

- Volume is reduced by up to 50%
- Less frequent collection, fewer trips to disposal site, save on bag tags
- Keeps odours out, makes garbage much less “interesting” for animals

# HAVEN'T WE SOLVED THIS ALREADY?

## GREEN BINS

- Major **capital expenditure** to invest in **processing & collection infrastructure**
- **Contamination** is an ongoing challenge
- **GHG emissions** and **safety concerns** from collection vehicles
- **Participation rates** are often lower than desired, particularly in **multi-residential dwellings**
- **Service disruptions** due to labour strikes, vehicle breakdowns, or inclement weather

## BACKYARD COMPOST

- **Space, ability, and know-how** are limiting factors
- Most users **do not compost in winter** or inclement weather
- May **attract pests/animals** or create unpleasant **odours**
- **Participation rates** are relatively low and stagnant
- Can produce **methane** if done incorrectly

## LANDFILL

- **Easiest solution** and often perceived as the most cost-effective in the short term
- Waste is typically **out of sight and out of mind** for consumers
- High levels of GHG emissions, particularly **methane**
- Long-term **environmental hazard** requires monitoring / maintenance
- **Landfill capacity** is quickly running out

## FoodCycler™ Eco 5

# THE SOLUTION

## IN THREE SIMPLE STEPS

1. Add waste to bucket
2. Add bucket to unit
3. Press Start. That's it!

The resulting by-product can be used in many applications.

Vegetable & Fruit Scraps

Starches

Most Animal Bones

Dairy Products

Tea bags & Coffee grinds

Egg shells

Nut shells, nuts & seeds

Meat, poultry & fish

# 90% FOOD WASTE REDUCTION

Full bucket of wet,  
smelly food waste

2.5L / 5L

Handful of dry, sterile, odourless  
& nutrient-rich by-product

100 g / 200 g

(Overnight)

0.8-1.5 kWh  
(Equivalent to a laptop)

\$0.10-\$0.15 per cycle  
(\$2-4 per month)

# FOODILIZER™ : BENEFICIAL USES

---

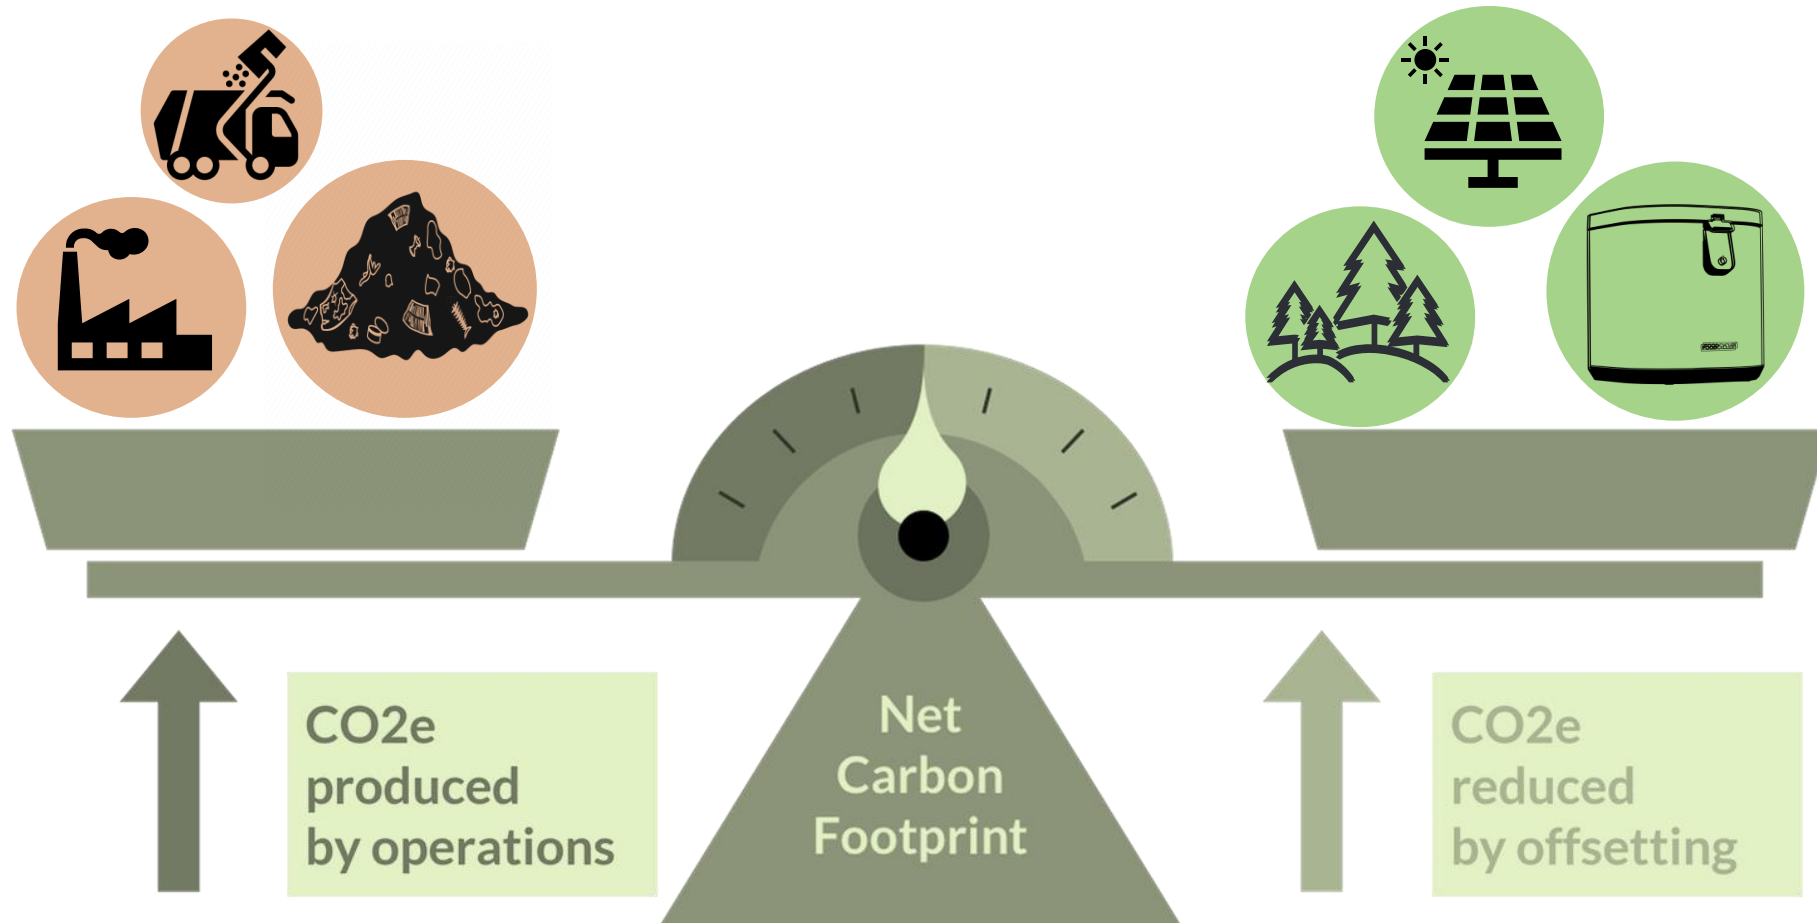

The FoodCycler by-product is a dry, sterile, odourless and nutrient-rich biomass with many beneficial uses and practical applications:

- Add to garden soil
- Add to backyard composter/tumbler/green cone
- Integrate to existing Leaf & Yard waste systems
- Pelletize/briquette as home heating alternative
- Drop off at compost site
- Drop off to a local farm
- Drop off to a community garden
- Add to Green Bin (where available)

# IMPACT: ENVIRONMENT

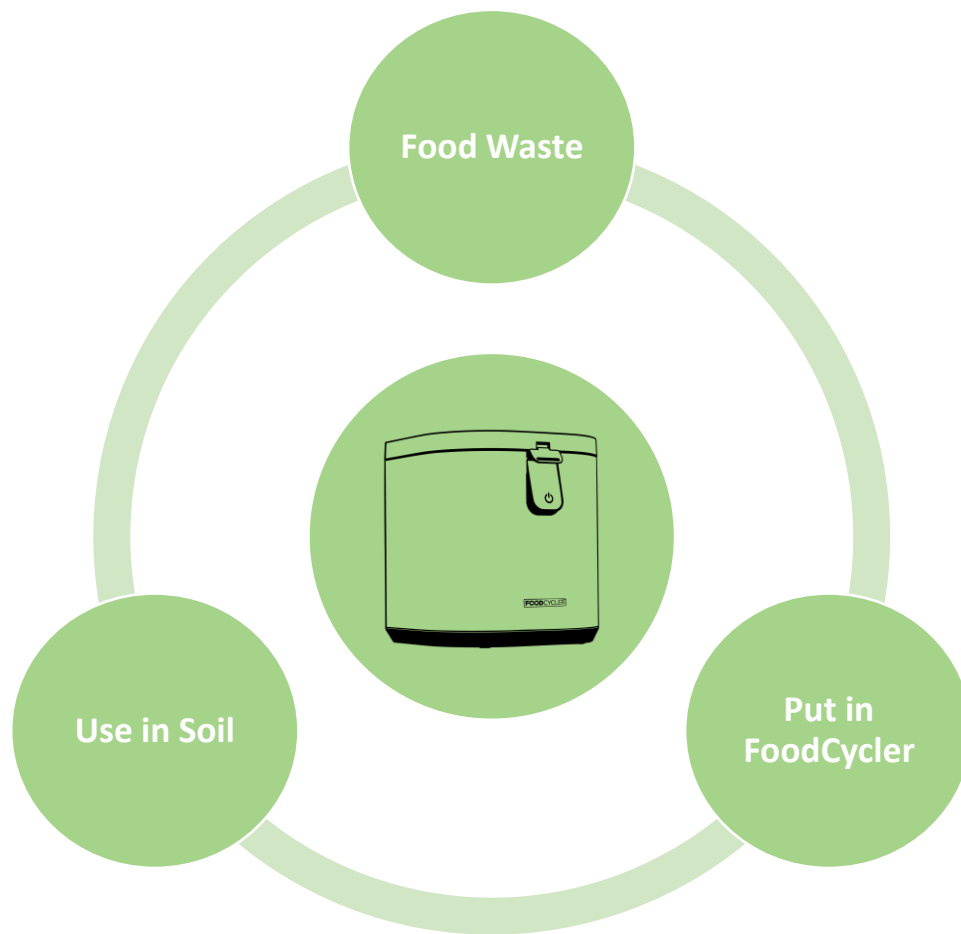

## The Path to Net Zero

# IMPACT: ECONOMIC

Traditional Waste Management

FoodCycler

# IMPACT: PRESSURE

## Regulatory + Social

### THE TIME IS NOW

- Constituents want **solutions** to reduce their environmental impact
- Waste is perceived as a government problem and **regulations** are coming
- Food waste is “low-hanging fruit” to achieving higher **diversion** and addressing the environmental impact of waste

*"I've received a number of positive messages from residents saying, "sign me up, where can I get mine." I'm 100 per cent in favor of it."*

**Deputy Mayor Lyle Warden, (South Glengarry ON)**

*"We were extremely happy with this program and loved that it made us aware of our daily waste."*

**Pilot participant in South Glengarry**

*"It's a great tool to reduce household waste. Appreciate that the municipality is being innovative and piloting different solutions."*

**Pilot participant in Hornepayne**

*"It alleviates a lot of the concerns that people might have with backyard composting. The time commitment, the location, pests and animals..."*

**Kylie Hissa, Strategic Initiatives Officer  
(Kenora, ON)**

# THE FOODCYCLER PILOTS

The results are in.

We've heard from:

**10,000+**  
Households

**80+**  
Municipalities

**Participation Rate** **98%**

- 98% of pilot participants will continue using the FoodCycler after the pilot period

**Recommendation Rate** **96%**

- 96% of users would recommend the FoodCycler to friends/family/neighbours

**User Experience Rating** **4.6/5**

- 4.6 out of 5 star rating for the overall user experience of the FoodCycler

**Net New Diversion** **300 kg**

- Each participating household is estimated to divert approximately 300 kg of food waste per year

**Awareness + Prevention** **77%**

- 77% of pilot participants resolved to waste less food as a result of increased awareness

# PILOT PROGRAM

12 Weeks from Start to Finish

## PILOT TIMELINE

### START

Residents purchase FoodCycler at a subsidized rate from Municipal Office (or other designated location)

### 12 WEEKS

Participants use the unit for a period of 12 weeks.

Number of cycles per week are tracked to estimate total diversion achieved.

### END

Participants fill out an exit survey, providing their review of the program and any other feedback.

Survey results used to evaluate program success.

### NEXT STEPS

Tailored program design and implementation.

Grants may be available, with support from Food Cycle Science.

# FUNDED PILOT PROGRAM OPTIONS

## Pilot Scope Recommendations

Municipality Population	Pilot Scope	Municipal Investment
< 2,500 Residents	50 Households	\$5,000
2,500 – 10,000 Residents	100 Households	\$10,000
10,000 – 20,000 Residents	200 Households	\$20,000
> 20,000 Residents	250+ Households	\$25,000+

- **Plus shipping costs and applicable taxes**

# PARTNERSHIP BENEFITS

## Why pilot with us?

- 🍃 Opportunity to trial a food waste diversion solution at a **cost well below market prices**
- 🍃 Immediate impact of reduced residential waste volumes thus **increasing diversion rates**
- 🍃 **Reduced costs** associated with waste management (collection, transfer, disposal, and landfill operations)
- 🍃 The **reduction of greenhouse gas (GHG)** emissions from transportation and decomposition of food waste in landfills
- 🍃 Extend the **life of your landfill(s)**
- 🍃 Opportunity to support **Canadian innovation** and clean tech
- 🍃 Opportunity to provide **residents** with an innovative solution that reduces waste and fights climate change, at an affordable price
- 🍃 Obtaining **data** that could be used to develop a **future organic waste diversion program**

## Next Steps:

- 🌱 Receive presentation as information.
- 🌱 If interested in partnering, refer to Staff for a recommendation to Council.
