

ACCESSIBILITY IN TO PRACTICE

Continuing Education Workshops with Julie Sawchuk

The world of accessibility does not need to be complicated and overwhelming. Nor is it an abstract concept or a box to check. Bring your team together to discuss, learn, and gain real-life insights into what is needed to create accessible spaces that honour the needs of everyone. We will address the issues that have serious implications for the lives of more than 28% of the population.

Insights from your time with Julie will allow you to step into the future with pride, confidence and clarity to embed best practices in all your future work.
