Single Surface Treatment means a single application of bituminous binder (ie. HFRS-2) followed by a single application of Class 6 aggregate and must conform to Ontario Provincial Standard Specification (OPSS) 304.

In 2025, Staff are proposing to apply Single Surface Treatment to approximately 12 kms of road in Brockton, the equivalent of approximately 176,232 Litres of HFRS-2 bituminous binder (oil) and approximately 1,200 tonnes of Class 6 Aggregate.

Staff put out an RFQ to the previously two lowest bidders to have this work completed as per our procurement process. Miller Paving Limited came in with the lowest bid. Staff are satisfied with the tender results as outlined below.
