**Subject:** Speed Bump

Hello Gentleman,

This just came to my attention from our new board member. Jamie Culliton works for a company that produces speed bumps and he has advised he would be happy to provide a speed bump that could be installed before the bend leading further down Road 1. He would also take responsibility for installing and removing the speed bump in and out of the winter season. Is this a item would could add to our request or look at further down the road?

Cheers, DR

Derrick Ross
