**Subject:** RE: Saugeen River Access Point Creel

Hello Brad and Colleen,

I have attached a presentation that describes our plan for the recreational angler survey and use of activity counters to augment this survey.

We are hoping to get written permission from Brockton to put activity counters at two popular parking locations for anglers on Concession 2 Sdr as shown below. The location where the bridge is on Concession 2 sdr is part of our angling regulations that changed following the removal of the Truax Dam and we are interested in understanding usage following the change. The other location is in close proximity and anecdotal reports suggest moderate angling traffic.

Thanks!
