I fully support the installation of cameras at the community center and centennial park. I have felt for years that it is a simple solution to deter vandalism and help keep people feeling safe and secure. I would like to see them at all the parks.

Bravo! I commend the municipality for looking into these cameras. Too much vandalism occurs to our assets in this community. Staff and users need this added protection.

Hi Fiona

We live just above Centennial Park and over the years have seen the results of many acts of vandalism suffered in the park, including spray painting on the buildings and damage to the play equipment as well as to the splash pad sign and benches. Could it be something to consider to include and expand the video surveillance to also encompass those areas? This might just deter 'would be' vandals in the park as well.

Thank-you for your consideration in this matter.

Sincerely,
Resident

Gooday! We live at Address and we see a lot of weird things including damage done to different areas of the park-my Question would be why only at the pool? Also we are always being blocked in along with the fire hydrant,how do we request no parking signage? Yes it is in the drivers handbook but some people aren't respectful. Thanx Resident

Ms. Hamilton, I think the cameras are a great idea. Anything to cut down on the vandalism should be welcomed. Innocent people enjoying the facilities named will not object to being on camera. Excellent idea!

As a citizen of Brockton, I think this is an excellent idea! Sadly, in this world we live in today these safety measures seem necessary, however, so be it!
I see it as an investment for protection.

You should put cameras out at the cardboard recycling area. A lot of people dump all kinds of stuff there. There are people that go into clothing bins and pull out clothes and don't put back either.
