

ST. THOMAS' ANGLICAN CHURCH – 305 COLBORNE STREET SOUTH, WALKERTON

The south side of the roof has already been replaced with a 50-year Hy-Grade steel roofing system.

The proposed project in 2019 calls for the replacement of the north and east sides of the building, using the same system by the same company. Water leakage is occurring in these areas so the work is required immediately to prevent damage to the interior of the church.
